Website: www.epoc-pnrr.uvt.ro

We are pleased to invite you to the “12th Workshop on Spatial Data Analysis”, an academic event dedicated to exploring the integration of spatial data techniques and econometric methods in the analysis of socioeconomic and environmental phenomena.

This workshop is organised within the framework of the project *Economics and Policy Options for Climate Change Risk and Global Environmental Governance (EPOC) – OS5*, which aims to valorise and disseminate research results and to strengthen academic collaboration.

The event contributes to the sub-activity A.5.1. – “Ensuring the project’s visibility by fostering connections and partnerships with organisations involved in related fields (match-making activities and B2B), in order to support the development of professional networks.”

Hosted by West University of Timisoara, Faculty of Economics and Business Administration, East-European Center for Research in Economics and Business, Finance, Business Information Systems and Modelling Department in partnership with Balikesir University and Academy of Economic Studies of Moldova, the workshop brings together participants from diverse academic backgrounds to engage in interdisciplinary learning and knowledge exchange.

The workshop will provide participants with both theoretical insights and practical experience in spatial data analysis, including the use of GIS tools (QGIS, GeoDa) and econometric techniques in Stata. It aims to support the development of analytical skills relevant for research and policy-making in areas such as regional development, climate change, and environmental governance.

We look forward to your participation.
